

## RESOLUTION 09-33 DUST CONTROL

WHEREAS, numerous requests are received by Warren County for the placement of dust control on various sections of local secondary roads, now;

BE IT RESOLVED on a motion by Marvin Grace, second by Doug Shull, that the following policy be adopted for the placing of dust control material on the local secondary road system in the 2009 calendar year:

1. Dust control placed on any local secondary road shall be at the property owner's expense.
2. Information for a permit for the application of any dust control material to any local secondary road shall be obtained from the Office of the County Engineer. The type of dust control material must be approved by the County Engineer.
3. A permit holder shall be responsible for the maintenance of any potholes, washouts, secondary ditches, etc., which develop in the treated surface. Failure of the permit holder to perform the said maintenance will result in Warren County scarifying and blading the entire surface without notice to the permit holder.
4. If the area to be treated does not have adequate drainage, in the opinion of the County Engineer, the permit will be denied until such time as the drainage problem can be corrected by the maintenance personnel.
5. The permit holder shall be responsible for the placement and maintenance of necessary signs and flags designating the outer limits of where the dust control material is placed. Failure to do so can result in Warren County blading the area stabilized, for which Warren County assumes no liability.

and that the Secondary Road Department be authorized to place dust control material on the following road which is carrying other than normal traffic:

North Street in the Village of Churchville

ACCEPTED AND APPROVED this 6<sup>th</sup> day of January, 2009.
